

新一代電子書使用與管理平台

2017/10/18

宗旨

ProQuest 長期以來於與全球圖書館緊密合作，專注於了解研究人員不斷變化的資訊需求，在這資訊瞬息萬變的時代，致力於開發創新電子書產品，來滿足使用者最需要的內容與服務。

平台沿革

Ebook
Central

核心價值

收錄內容

- 涵蓋ProQuest – ebrary與EBL兩大電子書內容
- 790,000+ 總書量
- 650+ 間合作出版社
- 1,350+ 出版品牌

ProQuest Ebook Central

最權威、最具深度與廣度的電子書使用資源平台

主題涵蓋

- Arts
- Business/Management
- Education
- Health & Medicine
- History & Political Science
- Law
- Literature & Language
- Religion & Philosophy
- Science & Technology
- Social Science

Ebook Central平台支援多種語系

The screenshot shows the ProQuest Ebook Central interface. At the top, there is a search bar with the placeholder text "Keyword, Author, ISBN, and more" and a search icon. To the right of the search bar are links for "Advanced Search" and "Browse Subjects". Below the search bar, the word "Language" is displayed in a large, blue font. Underneath "Language", the text "SELECT LANGUAGE" is followed by a list of language options, each with a radio button. The options are: English, Čeština, Français, Deutsch, Português, Español, 简体中文, 繁體中文, 日本語, 한국어, and Türkçe. The "繁體中文" option is highlighted with a red rectangular box. At the bottom of the language selection area, there are two buttons: "Cancel" and "Save Changes".

描述

This text introduces students to the essentials of the major contributing disciplines – biomechanics, physiology and psychology. It provides detailed knowledge and understanding of each subject area combined with explicit advice on how to study effectively, research further and think critically. Case studies clearly relate theory to practice and learning exercises support readers throughout the text.

The screenshot displays the ProQuest Ebook Central interface. At the top, there is a dark blue header with the ProQuest Ebook Central logo on the left and navigation links (首頁, 搜尋, 書櫃, 設定) on the right. Below the header is a toolbar with various icons for document manipulation. The main content area shows a document page with the page number '150' and the title 'Nanomaterials'. The text on the page discusses the use of CNTs in cancer therapy, specifically mentioning conjugation with vaccines and antibodies, and the application of hyperthermia and gene delivery systems. A sidebar on the left contains navigation icons, and a right sidebar is partially visible.

150 Nanomaterials

be achieved by conjugation CNTs with either a cancer vaccine or a therapeutic antibody. Some authors have validated the use of CNTs as vaccine delivery tools. Yang's group observed that the conjugate of MWCNTs and tumor lysate protein (tumor cell vaccine) can considerably and specifically enhance the efficacy of antitumor immunotherapy in a mouse model bearing the H22 liver tumor [22].

4.3. Local Antitumor Hyperthermia Therapy: The hyperthermia therapy using CNTs has been recently suggested as an efficient strategy for the cancer treatments. SWCNTs exhibit strong absorbance in the near-infrared region (NIR; 700–1100 nm). These nano-materials are considered as potent candidates for hyperthermia therapy since they generate significant amounts of heat upon excitation with NIR light [23]. The photo-thermal effect can induce the local thermal ablation of tumor cells by excessive heating of SWCNTs shackled in tumor cells such as pancreatic cancer. Some progress in the technique has been achieved in recent years, and it has shown feasibility in clinical application.

4.4. Gene Delivery Systems: In a gene therapy treatment technique, the genetic materials (DNA or RNA) are delivered as pharmaceutical agents to help target cells to recover missing or defective genes and generate their own therapeutic proteins with minimal toxicity to cure a disease. This technology is a promising treatment option especially in cancer and is expected to be an alternative method to traditional chemotherapy. Functionalized-CNTs (f-CNTs) seem to be very suitable for gene therapy because they are easily able to cross cell membranes and deliver genes into cells. In many reports, DNA and RNA have been covalently and non-covalently attached to f-CNTs. It has been found that not only DNA molecules can be linked to the tips and walls of f-CNTs, but also can be encapsulated inside the structure. Release of DNA molecules from CNTs-based delivery systems using thermal properties of CNTs has been investigated and it has been found that DNAs can be released from f-CNTs transporters to the nucleus after the laser pulses [24-26].

5. Cellular Internalization of CNTs

便利閱讀利用工具

The screenshot displays the ProQuest Ebook Central interface. On the left, a sidebar shows the 'ANNOTATIONS' section for the book 'Colour Coding for Learners with Autism'. The table of contents lists chapters and pages, with a callout '1' pointing to 'Chapter 1: True Colours'. The main content area shows a page from the book with several paragraphs. A callout '2' points to a toolbar with color-coded highlighting options (yellow, blue, red). A callout '3' points to a toolbar with a fixed list of annotation tools. A callout '4' points to a pop-up window for adding annotations. A callout '5' points to a toolbar with a fixed list of annotation tools. A callout '6' points to a blue bookmark icon.
